PROFILE SUMMARY

I am an AWS and Azure certified Cloud Engineer with over 6 years of overall IT experience, including more than 4 years focused on DevOps and cloud platform engineering. I have hands-on experience designing, building, and managing secure, scalable, and highly available cloud environments across AWS and Azure. My work includes automating infrastructure using Terraform, managing Kubernetes clusters such as EKS and AKS, and implementing CI/CD pipelines to improve deployment processes. I focus on reliability, performance, and cost optimization while delivering practical cloud solutions that align with business requirements.

EDUCATION

2023 - 2025

HERTFORDSHIRE UNIVERSITY

MSc in Data Science

2010 - 2014

ST. ANN'S COLLEGE OF ENGINEERING AND TECHNOLOGY

Bachelor of Technology

CERTIFICATIONS

AWS:

1. AWS Certified Solutions Architect – Associate (SAA-C03)

Microsoft:

2. Microsoft: Azure Fundamentals
3. Microsoft: Power BI Data Analyst
4. Microsoft: Associate Fabric Analytics Engineer Associate

WORK EXPERIENCE

L&T, Bangalore JUNE 2020 - AUG 2022

Senior DevOps Engineer

- Designed and automated AWS infrastructure using Terraform modules, provisioning services including AWS EC2, AWS S3, AWS IAM, AWS EKS, Application Load Balancer (ALB), and Auto Scaling Groups, reducing manual provisioning effort by 40%.
- Built and maintained CI/CD pipelines using Jenkins, integrating Maven and SonarQube to automate build, testing and code quality checks.
- Created and maintained YAML-based pipeline configurations and Kubernetes manifests to standardize deployments across environments.
- Managed EKS/AKS clusters running 20+ microservices in production, implementing HPA, autoscaling, and resource optimization to maintain 99.9% availability.
- Built and maintained Docker images and configured container - based build agents, improving build performance by ~30%.
- Implemented centralized monitoring and alerting using Prometheus, Grafana, and CloudWatch, improving incident detection time and reducing MTTR.
- Worked extensively with AWS services including IAM, RDS, Route53, VPC, DynamoDB, SQS and SNS to support secure and scalable applications.
- Collaborated with development and QA teams in Agile sprints using Jira and Confluence to support regular releases.
- Designed secure VPC architecture with public/private subnets, NAT Gateway, and security group segmentation.
- Experience in creating HLD and LLD documents and collaborating with stakeholders to align technical solutions with business needs.

SKILLS

- **Cloud Platforms**
  AWS, Azure
- **Containers & Orchestration**
  Docker, Kubernetes (AKS, EKS), Helm
- **Infrastructure as Code**
  Terraform, ARM Templates, CloudFormation
- **CI/CD & DevOps Tools**
  Jenkins, Azure DevOps Pipelines, AWS CodePipeline, Git
- **GitOps & Version Control**
  Git, GitHub, GitLab, Bitbucket, GitOps
- **Configuration Management**
  Ansible, Chef
- **Monitoring & Logging**
  Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor, Nagios
- **Scripting & Automation**
  Python, Bash, Shell Scripting, PowerShell, YAML
- **Databases**
  SQL Server, MySQL, PostgreSQL, NoSQL
- **Tools & Methodologies**
  Jira, ServiceNow, Agile, Scrum

WORK EXPERIENCE

Tech Mahindra APRIL 2018 - JULY 2020

DevOps Engineer

- Automated AWS infrastructure provisioning using Terraform and Chef, helping teams deploy environments faster and more consistently.
- Supported Kubernetes deployments using manifests and Helm charts to simplify application releases.
- Built and maintained Jenkins pipelines to automate build and deployment workflows for containerized applications.
- Implemented Docker-based deployments and managed container images using Artifactory and Nexus.
- Configured AWS services including EC2, S3, EBS, Lambda, Auto Scaling and VPC to support application hosting and scaling.
- Set up centralized logging using the ELK stack and configured monitoring and alerts with CloudWatch, Nagios and Grafana.
- Wrote Python and Shell scripts to automate operational tasks and data migration processes.
- Worked closely with development teams to troubleshoot deployment and environment issues.

Wipro Nov 2015 - Mar 2018

Database Administration

- Handled daily SQL Server health checks, monitoring alerts and responding to production tickets based on priority.
- Managed database backups, restores and refresh activities between production, test and development environments.
- Monitored disk space and cleaned up old backups and unused files to prevent storage issues.
- Supported database performance tuning by identifying missing indexes and resolving blocking issues.
- Assisted in setting up Log Shipping and Database Mirroring for high availability.
- Worked with application teams to troubleshoot database-related issues and support release activities.
